

Nobimpex N110 MSC Cell Expansion Medium

Product Overview:

Nobimpex N110 is a serum-free and Xeno-free medium which developed for the maintenance and amplification of human mesenchymal stem cells (MSCs) from different sources.

Application:

Ready to use medium (MSC coating agent and MSC enhancer are included).

The medium is optimized for the growth of all types of human MSCs derived from different sources.

Feature:

- Stably maintains the phenotype and differentiation potential of human umbilical cord MSCs.
- Stably maintains the phenotype and differentiation potential of human adipose MSCs.
- Stably maintains the phenotype and differentiation potential of human bone marrow MSCs
- Stably maintains the phenotype and differentiation potential of human dental pulp, amniotic membrane MSCs.

Storage:

- Keep away from light, 2-8 °C. Do not freeze.
- MSC coating agent and MSC enhancer should storage at -20 °C.
- The shelf life is 12 months (from the date of production).
