

Nobimpex N115 NK Cell Expansion Medium

Product Overview:

Nobimpex N115 is a serum-free and Xeno-free medium optimized for the expansion of NK cells from human peripheral mononuclear cells (PBMCs) or isolated NK cells.

Application:

Nobimpex 115 is a ready to use medium. It has been optimized for the growth of NK cells from PBMC or isolated CD3-CD56+ cells.

Feature:

- No need to add serum during the culture.
- Robust NK cells expansion for 21 days in culture.
- Yield high percentage (~90%) of CD3-CD56+ NK cells.

Storage:

- Keep away from light, 2-8 °C. Do not freeze.
- The shelf life is 18 months (from the date of production).
